

New from Almi

The AL 43SH hydraulic block cutter

FASTER WORK:

The 25-mm stroke enables you to cut blocks differing by a maximum of 25 mm from each other without needing to adjust the height.

With the new patented system's five hydraulic cylinders the machine cuts only once the pressure exerted by the flexible blade is the same along the entire block or slab. One push of a button is sufficient to cut every type of material. The "SH" has no problems cutting even "difficult" types of stone, such as natural stone or other stones with an irregular surface (max. 4 mm).

Light in weight.

Equipped with frame and hoisting eye. A service free battery and automatic charger fitted in the housing guarantee trouble-free operation and a long useful life. The charger, with an excellent charging characteristic, ensures for the intelligent charging of the battery; it switches to maintenance mode once the battery is charged.

ALMI: "THE ART OF LETTING TECHNOLOGY DO THE WORK"

| AL43SH 14 TON / 21 TON | |
|------------------------|---|
| Cutting width | max. 440 mm. |
| Cutting height | 10-200 mm. |
| Stroke of upper blade | 25 mm. |
| Blade system | lamellae, "S" series, flexible mounting/fixed mounting. |
| Blades | hardened metal, can be used on three sides. |
| Pressure | 14.000 kg. / 21.000 kg. |
| Weight | 125 kg. |
| Battery | service free. |
| Charger | automatic (built into battery housing). |
| Handling | frame and hoisting eye. |
| Guarantee | 1 year, exclusive of battery, excepting normal wear. |
